

BARCO SERIES **SFL**

Machine Tool Coolant Union

Features & Benefits :

Operating Parameters :

Max. pressure
1500 psi 105 bar

Max. speed
8500 rpm 8500 min.

Do not run dry

The Barco SFL Rotary Union is designed with our state-of-the-art silicon carbide seals and the specially protected sealed-for-life bearings. This makes our union ideal for supply coolant to high-speed, multi-spindle heads. The Barco SFL is the only rotary union that's color coded to assure choosing the correct union in replacement situations.

Additional Benefits :

Unique, sealed-for-life, maintenance-free, lubed-for-life design.

Exclusive, large double-row angular contact bearings in a compact, rigid design with high tolerance to hose side-loading.

Directly interchangeable with virtually any OEM self-supported rotary union.

Color coded housing identifies mounting threads.

Applications :

Automotive transfer lines, Dial machines, grinding machines and gun-drills.

Engineered for Exceptional Performance
